

EK01 BAGGING MACHINE

Multi-product semiautomatic bagging machine

Semi-automatic multi-product bagging station EK01 equipped with a large loading hopper and precision scale programmable at the desired weight.

The extraction of the product from the hopper takes place by means of a conveyor belt operated by a motor-reducer.

The operator places the empty bag under the bag holder and the bagging machine fills it quickly and with the utmost precision thanks to the automatic weighing system.

Possibility of adjusting the feed speed of the unloading belt by means of a potentiometer, final filling phase at decreasing speed to increase weighing accuracy.

Ideal for packaging bags of sawdust, coal, granular materials, fertilizers peanut, pellets, etc.

Medium-wide mouth hopper for easy filling with a mechanical shovel of bulk material or by emptying an entire big bag into the hopper.

FEATURES:

- Bagging capacity 2 tons / hour
- Productivity (2.5 bags per minute depending on the material, the size of the bags and the skill of the operator)
- Hopper capacity 1.5 m³
- Overall dimensions L 130cm x W 250cm x H 225cm
- Support base on four legs with dimensions of 100cm x 100cm
- Total weight is about 350 Kg
- Precision weighing +/- 100 grams
- Possibility of preparing bags from 1 to 50 kg
- Possibility of adjusting the feed speed of the unloading belt by means of a potentiometer, final filling phase at decreasing speed to increase weighing accuracy.
- Continuous regulation of material flow
- Power supply 220V single-phase 0.37 KW

- 3-layer painting (one anticorrosive layer and two enamel layers)
- Instruction manual
- Made in EU
- Certification CE

ACCESSORIES:

ROLLER:

HEAT SEALER for plastic bags sealing:

ASPIRATOR:

-WHEELS FOR MOVING:
